

FAQ

Procurement Department — Frequently Asked Questions

Version: 2.0 | Last Updated: Jun-2026 | Audience: Internal Requestors & Vendors

Vendor Onboarding

Q: How long does vendor empanelment typically take?

A: For indirect-category vendors, empanelment typically takes 10–15 working days. For direct material vendors requiring an on-site quality assessment, the process can take 4–6 weeks.

Q: My company is already an SCPL vendor for one plant — do I need to re-register for another plant?

A: No. Empanelment on the Approved Vendor List (AVL) is company-wide; however, site-specific quality audits may still be required for direct material categories before supply commences at a new location.

Purchase Requisitions & POs

Q: How do I raise a purchase requisition as an internal employee?

A: Purchase Requisitions (PR) are raised through the SAP Ariba portal, selecting the relevant cost centre and category; the system routes it automatically per the approval matrix.

Q: What is the typical turnaround time from PR to PO issuance?

A: For catalogue/AVL purchases below Rs. 5 lakh, turnaround is typically 3–5 working days. Non-catalogue or competitive-bid purchases take 2–4 weeks depending on value and complexity.

Q: Can I procure directly from a vendor without a PO in an emergency?

A: Only under the Emergency Procurement provision (plant breakdown, safety-critical items), capped at Rs. 10 lakh, with mandatory post-facto approval filed within 5 working days.

Vendor Payments & Performance

Q: Who do I contact regarding a delayed payment for goods supplied?

A: Vendors should first check invoice/GRN status on the Vendor Portal, then escalate to the Accounts Payable helpdesk if payment is overdue beyond the agreed term.

Q: What happens if a vendor consistently misses delivery timelines?

A: Repeated delivery failures trigger a formal Vendor Corrective Action Request (VCAR); persistent non-performance can lead to suspension or removal from the Approved Vendor List.

Q: How can a vendor be considered for delisting or blacklisting?

A: Blacklisting is considered for serious quality failures, ethical/compliance violations, or repeated unresolved VCARs, and requires joint sign-off from Procurement and Legal & Compliance.
